

# Celebrate Tumamoc!

January 21-22 and 28-29, 2012  
Saturdays/Sundays 10AM-5PM  
Four days of science, culture,  
music and art.

A free event celebrating  
Arizona's Centennial.

# Celebrate Arizona's Centennial, UA Science and Tumamoc Hill.

Saturdays and Sundays

January 21-22 and 28-29, 2012

10AM to 5PM

## Come enjoy four days of science, culture, music and art.

Tumamoc has a great tradition and an exciting future. In honor of Arizona's Centennial, UA Science: Tumamoc is opening its doors to show you what we have been doing. Come visit us.

Plan to spend an extra hour or two as you walk the Hill. Meet our scientists and browse the special displays inside and outside our historic buildings. We'll show you the history that has made us a National Historic Landmark. And we'll give you a glimpse of the archeology, ecology and conservation work that is still active today.

Enjoy the festive atmosphere as we bring you intimate, informal concerts with the cooperation and participation of the University of Arizona's School of Music and the rhythm and blues group, *Shaky Bones*.

- See art inspired by the Hill: [tumamocsketchbook.com](http://tumamocsketchbook.com)
- Enjoy live music from noon to 5pm.
- Look into the lives of saguaros and wildflowers.
- Meet the Hill's rarest plant, the Tumamoc globeberry.
- Learn the story of our ancient native cultures.
- Understand Arizona's rattlesnakes and Gila monsters.
- Peek into the future of sustainable life in Tucson.
- Discover how a century of science is being digitized.
- Learn of the world's oldest ecology study sites.

**There is no charge. So come as often as you can.**

The program will change from day to day—  
even hour to hour! Don't miss it.

Find out why Tumamoc is still making history.
